FOUNDER MESSAGE

MR. TAHIR RAZA (LATE)

I have a strong belief that business always requires the same ingredients for success: a winning combination of talent and personalities, full commitment, and the right management.

Raza Engineering is based on these principles. Our goal is to realize entrepreneurial ideas, dreams, and ambitions with potential for long term growth.

We support entrepreneurs not only with capital, but also with business acumen, networks, and the extensive experience of a unique team of people and companies to realize those dreams. This is what we call private equity with emotion.

Entrepreneurship is above all an ever learning curve, and in my journey as an entrepreneur I have been lucky to learn a lot from fellow team members, advisers, and customers a like. Along the bumpy road of learning and growing the business, one of the key things I realized is that the best business model is, first and foremost, when you put your heart and soul into your work. Second, know when the time comes to let your trusted experts do their jobs.
